

# DONALDSON AIR DRYER

Air Dryer Datasheet // Available part numbers

## Donaldson Air Dryers for a Reason!

Today's modern equipment is designed to meet highest performance standards. Therefore Donaldson is the right choice when it comes to replacement parts. To operate in a save manner and to keep your maintenance costs under control, using the right filter can save you time and money.

## Avoid brake failure and fit the right cartridge with superior filtration.

1,000 liters of clean dry compressed air per minute is needed to operate your equipment's brake and suspension systems. If the air drying and cleaning system is not maintained correctly, there is a serious risk of damage to braking and suspension components from water and oil contamination.

Donaldson coalescing air dryers provide high vehicle protection by removing water-and oil vapor or other contaminants before reaching the air tank and valves. This prevents equipment corrosion or freeze-up during the winter and extends the life of air valves.

Donaldson	Thread	Length	Drying performance	Oil separation efficiency	Aerosol separation efficiency
